Mona Lisa Touch laser therapy is a simple procedure completed in a short amount of time. It restores gynecologic health by generating new collagen, elastin, glycogen, and blood vessels in the vaginal tissue and vulvar tissue.

Get your sex life back this autumn!!!

Janis L. Enzenbacher, MD is a gynecologic expert who treats the vagina and the vulva. Dr. Enzenbacher has successfully treated over two dozen women with Mona Lisa Touch; we can

address lichen sclerosis, episiotomy scars, painful intercourse, mild stress incontinence, frequent urination and chronic UTI's.

Our office has real women who treat real women. You are listened to, your needs responded to and we know your anatomy.

Our Mona Lisa Touch patients are reporting improvements with their overactive bladder issues and greater sexual satisfaction even after their first session.

The Mona Lisa touch laser is used for the treatment of vaginal conditions due to estrogen deficiencies in menopause. This **non-surgical, painless** approach is **FDA approved**. It promotes vaginal mucosal regeneration and a return of the vaginal wall to a premenopausal state. Feel 25 again on the inside! No need for messy creams.
